

# MAPS

The simplest, most effective tool for presenting all relevant geographical data at a simple glance.

# MAPS

---

**MAPS ARE GREAT FOR SYNTHESIZING INFORMATION AND FOR UNDERSTANDING ANY SITUATION.**

## **They meet a number of key needs:**

- Summarizing information
- Illustrating specific situations
- Presenting and analysing the reality or potential of any given situation
- Establishing reference points
- Showcasing trends
- Explaining phenomena that are hard to illustrate any other way

## **Possibilities of several types of renderings:**

- Paper (standard size and large format (34" x 44"))
- Electronics (pdf)
- Online on our secure portal (CartoVista)
  - Interactive maps on the web (no software to install)
  - Simple and powerful tool for consultation and information sharing
  - Allows to consult, search, visualize, extract and share maps and data
