F0. Introduction

(F0.1) Give a general description of and introduction to your organization.

TC Transcontinental is a leader in flexible packaging in North America, and Canada's largest printer. The Corporation is also a Canadian leader in its specialty media segments. For over 40 years, TC Transcontinental's story has been one of innovation and transformation to meet our customers' evolving needs.

Our strong family values, entrepreneurial spirit and long-term vision have always been at the heart of our success. Our mission is simple: create products and services that allow businesses to attract, reach and retain their target customers. In this pursuit, we are firmly guided by our vision to become a top leader in flexible packaging in North America while maintaining our position as Canada's largest printer and as a leader in our specialty media segments. The quest for long-term value creation and profitable growth is part of our DNA, as a controlled company and good corporate citizen. This is and will continue to be our commitment to our customers, employees, shareholders and the communities in which we operate.

Transcontinental Inc. (TSX: TCL.A TCL.B), known as TC Transcontinental, has approximately 8,500 employees, the majority of which are based in Canada, the United States, and Latin America. TC Transcontinental had revenues of more than C$3.0 billion for the fiscal year ended October 27, 2019. For more information, visit TC Transcontinental's website at [www.tc.tc](http://www.tc.tc).

F1.6

(F1.6) Has your organization experienced any detrimental forests-related impacts?

No

F2. Procedures

F2.1

(F2.1) Does your organization undertake a forests-related risk assessment?

Yes, forests-related risks are assessed

F2.1a
(F2.1a) Select the options that best describe your procedures for identifying and assessing forests-related risks.

Timber products
- Value chain stage
  - Direct operations
  - Supply chain
- Coverage
  - Full

Risk assessment procedure
- Assessed as part of other company-wide risk assessment system

Frequency of assessment
- Annually

How far into the future are risks considered?
- 3 to 6 years

Tools and methods used
- Internal company methods
- Jurisdictional/landscape assessment

Please explain
TC Transcontinental has developed a solid Enterprise Risk Management framework for managing its principal risks. The objectives of this process are to identify the main risks inherent to the business, assess their impact, put in place a response strategy and monitor the progress of mitigation initiatives. The main risks identified through that process, many of which are of a recurring nature, fall into 3 categories: strategic, operational or financial. The list usually comprises of 15 to 20 risks, including the operational and reputational risks directly or indirectly related to climate change and environmental aspects, such as forest-related risks. More specifically in 2019, TC Transcontinental assessed the risks related to sourcing from High Conservation Value Forests (HCVFs) in Canada through ForestMapper, created by NGO Canopy. Questionnaires were asked to our suppliers to overlap our sourcing map to the ForestMapper and risky zones were identified.

(F2.1b) Which of the following issues are considered in your organization’s forests-related risk assessment(s)?

Availability of forest risk commodities
- Relevance & inclusion
  - Relevant, always included

Please explain
The Paper Procurement Team tracks the market for pulp and paper products diligently and assesses the risks associated with economic, social and environmental concerns of paper production.

Quality of forest risk commodities
- Relevance & inclusion
  - Relevant, always included

Please explain
Our paper purchasing policy states that TC Transcontinental promotes the use of papers made with maximized pre-consumer and post-consumer recovered fibres. Where virgin wood fibre is required, preference is given to fibres from responsibly managed forests with a chain of custody certification from a recognized forest certification system. TC Transcontinental recognizes FSC®, CSA and SFI® certification systems with respect to sustainable forest management, as well as PEFC Chain of Custody certification. These certifications attest that paper is sourced from forests in accordance with sustainable development principles. In addition, we have our own FSC®, SFI® and PEFC Chain of Custody certifications, enabling us to trace fibres directly from the forest to our printed product. The end consumer is thereby assured that the paper used is sourced from responsibly managed forests. TC Transcontinental is working with Canopy, a non-governmental organization, to encourage governments and the forestry sector to support and advance protection of the world’s ancient and endangered forests. We are proudly committed to contributing to the creation of conservation legacies in these landscapes of hope.

Impact of activity on the status of ecosystems and habitats
- Relevance & inclusion
  - Relevant, always included

Please explain
The CSR department, CSR committee and the procurement department follow all new scientific advances on the impact of paper production on ecosystems, notably through updates of third-party certification standards. TC Transcontinental also frequently discusses with environmental not-for-profit organization Canopy, which promotes forest conservation in Canada.

Regulation
- Relevance & inclusion
  - Relevant, always included

Please explain
TC Transcontinental closely follows all environmental laws in jurisdictions where it operates. Discussions with suppliers also ensure that they are compliant with all forestry laws, and third-party certification confirms adequate responsible practices.

Climate change
- Relevance & inclusion
  - Relevant, sometimes included

Please explain
Through its Paper Purchasing Policy, TC Transcontinental promotes the use of post-consumer recycled content or alternative fibres, when the life-cycle analysis shows environmental benefits.
Impact on water security

Relevance & inclusion
Relevant, always included

Please explain
TC Transcontinental discloses all water consumption company-wide. All facilities track their water consumption.

Tariffs or price increases

Relevance & inclusion
Relevant, always included

Please explain
The Paper Procurement Team tracks the market for pulp and paper products diligently and assesses the risks associated with economic, social and environmental concerns of paper production.

Loss of markets

Relevance & inclusion
Relevant, always included

Please explain
Consumer behaviour is changing from printed products to digital platforms, associated with the rise of the internet and electronic platforms and consumers' paperless preferences. TC Transcontinental aims at educating consumers on sustainable forestry and promoting the values of third-party certification.

Brand damage related to forest risk commodities

Relevance & inclusion
Relevant, always included

Please explain
Public campaigns on inadequate forestry practices have had impacts on the credibility of specific brands, but also of the overall paper industry. The Paper Purchasing Policy put forth by TC Transcontinental in 2012 is a risk mitigation tool that shows transparency and leadership in our purchase of paper.

Corruption

Relevance & inclusion
Relevant, always included

Please explain
TC Transcontinental has an “Irregularity, Fraud and Criminal Offense Whistleblowing Policy and Procedure” policy. This policy includes allegations of fraud, corruption, irregularity, embezzlement, non-compliant activity, theft or any act that is criminal or unethical. This policy applies to all cases where allegations of theft, fraud, corruption or non-compliant activities arise involving both employees and third parties.

Social impacts

Relevance & inclusion
Relevant, always included

Please explain
TC Transcontinental's Paper Purchasing Policy states that our suppliers must have mechanisms in place to ensure that virgin wood fibres come from areas where traditional and civil rights are respected. Responsible procurement was identified as material by our stakeholders during the materiality analysis carried out prior to setting objectives for our 2019-2021 plan. At the end of 2019, we started an evaluation process for our main suppliers, both in our Printing and Packaging sectors, through the EcoVadis platform. The EcoVadis sustainable procurement survey is set up to ask, among others, our suppliers about their CSR compliance, GHG emissions, energy efficiency programs and management. TC Transcontinental joined EcoVadis in the Fall of 2019 to assess the quality of its suppliers' CSR management system, including governance on climate-related issues and emission management. This tool will allow us to gather important information about our supply chain and identify areas of higher risks and opportunities for improvement. The results from the assessment of our first tier of suppliers will be available in September 2020 and will be key in informing our supply chain strategy going forward. The goal of this process is to integrate environmental, social and ethical criteria into our purchasing practices, in addition to traditional performance measures. The suppliers' responses will allow us to highlight best practices, identify areas for improvement and identify collaboration opportunities to progress towards our sustainable development goals. Phase 1 of the supplier assessments will be completed by August 2020. Phases 2 and 3 will be launched in the next months to include a wider array of suppliers.

Other, please specify

Relevance & inclusion
Please select

Please explain

F2.1c

(F2.1c) Which of the following stakeholders are considered in your organization’s forests-related risk assessments?

Customers

Relevance & inclusion
Relevant, always included

Please explain
TC Transcontinental's customers often show preferences for third-party certified fibre, or paper made with post-consumer recycled content. Nevertheless, our commitment to follow our Paper Purchasing Policy usually is our own corporate commitment, and the benefits are trickled down at our customer level.
Employees
Relevance & inclusion
Relevant, always included

Please explain
In 2018, we put in place a large-scale stakeholder consultation program on sustainability issues, as we had done in 2015. We surveyed our employees, suppliers, customers, investors and external interest groups on several social responsibility issues, including risks related to our supply chain and paper procurement processes. In total, close to 1,400 participants provided us with valuable insight into the priorities and objectives that should be reflected in our 2019-2021 CSR Plan. This process helped us set up a sustainable paper procurement for 2021.

Investors
Relevance & inclusion
Relevant, always included

Please explain
TC Transcontinental is aware of the reputational risk linked to its fiber procurement. This risk is important to our investors, as showed by our 2018 sustainability materiality assessment. Our Paper Purchasing Policy and its commitments are allowing us to mitigate that risk, and therefore protect the reputation and financial performance of the Corporation.

Local communities
Relevance & inclusion
Relevant, not included

Please explain

NGOs
Relevance & inclusion
Relevant, always included

Please explain
TC Transcontinental has developed its Paper Purchasing Policy with environmental NGO Canopy. TC Transcontinental joined the United Nations Global Compact, a voluntary initiative through which signatory companies commit to aligning their approach to social responsibility with universal principles relating to human rights, labour standards and environmental protection. Of the international sustainable development goals defined by the Global Compact, seven are fully aligned with the targets of our three-year Acting Together plan and our policies. We will refer to them in this report. For TC Transcontinental, this endorsement of the United Nations goals confirms our commitment to corporate social responsibility and its integration into our operations and culture. Our practices are in line with the United Nations Sustainable Development Goal 15, which aims to “promote the implementation of sustainable management of all types of forests, halt deforestation, restore degraded forests and substantially increase afforestation and reforestation globally”.

<tr>
<td>Other - Cocoa</td>
<td>&lt;Not Applicable&gt;</td>
</tr>
<tr>
<td>Other - Coffee</td>
<td>&lt;Not Applicable&gt;</td>
</tr>
</tbody>
</table>

F3.1a

(F3.1a) How does your organization define substantive financial or strategic impact on your business?

As part of our enterprise risk management process, risk impacts have been defined in four categories:

1. Minor, could represent a reduction of EBITDA of $1M,
2. Moderate, could represent a reduction of EBITDA between $1M and $5M,
3. Serious, could represent reduction of EBITDA between $5M and $20M,
4. Severe, could represent a reduction of EBITDA above $20M.

Substantive financial impact is considered for the ‘serious’ and ‘severe’ categories, or more specifically, for risks that could have a financial impact of more than $5M on EBITDA.

F3.1b

(F3.1b) For your disclosed forest risk commodity(ies), provide details of risks identified with the potential to have a substantive financial or strategic impact on your business, and your response to those risks.

| Forest risk commodity      | Type of risk | Geographical scale | Where in your value chain does the risk driver occur? | Primary risk driver | Primary potential impact | Company-specific description | Timeframe | Magnitude of potential impact | Likelihood | Are you able to provide a potential financial impact figure? | Potential financial impact (currency) | Potential financial impact figure - minimum (currency) | Potential financial impact figure - maximum (currency) | Explanation of financial | Primary response to risk |
|---------------------------|--------------|--------------------|-----------------------------------------------------|-------------------|-------------------------|----------------------------|-----------|-----------------------------|------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|--------------------------|--------------------------|-------------------------|
| Timber products           | Physical     | State or equivalent| Supply chain                                        | Forest fires      | Reduction or disruption in production capacity | Climate impacts on forests, such as fire patterns, pine beetle devastation, species health, etc., could disrupt the supply chain of timber products. | >6 years  | Medium-low                  | More likely than not       | No, we do not have this figure | <Not Applicable>               | <Not Applicable>               | <Not Applicable>               |                          | Supplier diversification |
**Description of response**
This risk is included in TC Transcontinental's risk assessment: contingency plans or alternative procurement strategies (more diversified procurement practices to prevent dependency on one geographical region and suppliers) are developed as mitigation strategies.

**Cost of response**
1320000000

**Explanation of cost of response**
Our purchasing, operations and distribution costs could be impacted by climate impacts, disruption in our supply chain, etc., therefore the cost of response could be as high as all of TC Transcontinental Printing sector revenues.

**Forest risk commodity**
Timber products

**Type of risk**

<Not Applicable>

**Potential financial impact figure - minimum (currency)**
<Not Applicable>

**Potential financial impact figure - maximum (currency)**
<Not Applicable>

**Explanation of financial**

**Primary response to risk**
Implementation of environmental best practices in direct operations

**Description of response**
TC Transcontinental has been showing leadership and transparency with respect to paper purchasing. It has a strong focus on sustainable paper procurement practices and has quantitative targets with respect to responsible purchasing. The Corporation also releases an annual Corporate Social Responsibility report with multiple key performance indicators for social, community, economic and environmental performance. TC Transcontinental joined Ecovadis in the Fall of 2019 to assess the quality of its suppliers’ CSR management system, including governance on climate-related issues and emission management. This tool will allow us to gather important information about our supply chain and identify areas of higher risks and opportunities for improvement. The results from the assessment of our first tier of suppliers will be available in September 2020 and will be key in informing our supply chain strategy going forward. The goal of this process is to integrate environmental, social and ethical criteria into our purchasing practices, in addition to traditional performance measures. The suppliers’ responses will allow us to highlight best practices, identify areas for improvement and identify collaboration opportunities to progress towards our sustainable development goals. Phase 1 of the supplier assessments will be completed by August 2020. Phases 2 and 3 will be launched in the next months to include a wider array of suppliers.

**Cost of response**
1000000

**Explanation of cost of response**
Investments had to be made in order to ensure the implementation of environmental best practices in our direct operations. The cost of response covers the EcoVadis fees and sustainable procurement best practices and initiatives.

(F4.3) Do you provide incentives to C-suite employees or board members for the management of forests-related issues?

<table>
<thead>
<tr>
<th>Provide incentives for management of forests-related issues</th>
<th>Comment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Row 1 No, and we do not plan to introduce them in the next two years</td>
<td>TC Transcontinental has put in place annual performance assessments for all salaried employees. Performance discussions are a powerful driver of corporate and individual performance and represent a precious opportunity for managers and employees to stop and have a conversation on performance, individual development goals and career interests. Attainment of personal objectives included in the performance evaluation process can affect monetary incentives received by the employee. Many individuals in the organization have personal objectives related to climate-related issues included in their performance evaluation. For example, monetary savings from sustainable procurement projects and initiatives are used, among others, to determine annual bonuses. Indeed, TC Transcontinental established a target in its 2019-2021 Corporate Social Responsibility Plan to promote the use of sustainable materials: 100% of our paper purchases to come from a third party certified or recycled sources. Corporate and other positions related to sustainability and environmental compliance, also have specific personal performance objectives directly or indirectly related to climate.</td>

<td>Company-wide</td>
<td>Commitment to eliminate conversion of natural ecosystems</td>
<td>As the leading Canadian printer, TC Transcontinental buys important quantities of paper each year. We believe that by playing an active role in the paper procurement process we can not only have a positive impact on forest management practices, but also protect biodiversity and ecosystem integrity, thereby bringing long-term social and economic benefits to communities. This is why we have updated in 2012 our Paper Purchasing Policy, which sets out guidelines for our supply of paper (see attached). Our 2019-2021 Corporate Responsibility Plan also sets the target to promote the use of sustainable materials, the target is to reach 100% of our paper purchases to come from a third party certified or recycled sources. In 2007, TC Transcontinental published its first paper purchasing policy, whose scope was expanded in 2012. Its implementation has shown excellent results. In fact, the proportion of paper purchased that is FSC®, SFI® or PEFC certified or contains 100% recycled content reached 99% in 2019, up from 67% in 2012. Our in-house produced educational books are printed on 100% certified papers. We also hold FSC®, SFI® and PEFC chain-of-custody certifications, which allow us to track fibres directly from their origin all the way to our printed product. Our practices are in line with the United Nations Sustainable Development Goal 15, which aims to “promote the implementation of sustainable management of all types of forests, halt deforestation, restore degraded forests and substantially increase afforestation and reforestation globally”.</td>

F4.6

(F4.6) Has your organization made a public commitment to reduce or remove deforestation and/or forest degradation from its direct operations and/or supply chain?

Yes

F4.6a

(F4.6a) Has your organization endorsed any of the following initiatives as part of its public commitment to reduce or remove deforestation and/or forest degradation?

Other, please specify (Paper purchasing policy & certification)

F4.6b
(F4.6b) Provide details on your public commitment(s), including the description of specific criteria, coverage, and actions.

Forest risk commodity
Timber products

Criteria
Zero gross deforestation/ no deforestation
Zero net deforestation
No conversion of High Conservation Value areas
Adoption of the UN International Labour Organization principles
No sourcing of illegally produced and/or traded forest risk commodities
No sourcing of forest risk commodities from unknown/controversial sources
Restricting the sourcing and/or trade of forest risk commodities to credible certified sources

Operational coverage
Direct operations and supply chain

% of total production/ consumption covered by commitment
91-99%

Cutoff date
Not applicable

Commitment target date
2021-25

Please explain
As the largest printer in Canada, TC Transcontinental purchases significant quantities of paper every year. Through our procurement, we therefore play an active role in making a significant and positive impact on forest management practices. In doing so, we can help protect natural resources, creating long-term socio-economic benefits for communities. In light of this, TC Transcontinental issued its first paper purchasing policy in 2007, and expanded its scope in 2012. Developed in collaboration with Canopy, a non-governmental organization, this policy encourages among others the responsible use of natural resources and promotes the protection of ancient and endangered forests. In particular, our paper purchasing policy states that TC Transcontinental promotes the use of papers made with maximized pre-consumer and post-consumer recovered fibres. Where virgin wood fibre is required, preference is given to fibres from responsibly managed forests with a chain of custody certification from a recognized forest certification system. TC Transcontinental recognizes FSC®, CSA and SFI® certification systems with respect to sustainable forest management, as well as PEFC Chain of Custody certification. These certifications attest that paper is sourced from forests in accordance with sustainable development principles. In addition, we have our own FSC®, SFI® and PEFC Chain of Custody certifications, enabling us to trace fibres directly from the forest to our printed product. The end consumer is thereby assured that the paper used is sourced from responsibly managed forests. The implementation of this policy has produced compelling results. In fact, the proportion of our purchases of papers that are FSC®, SFI® or PEFC certified or are made with 100% recycled fibres reached 99% in 2019, while it stood at 67% in 2012. TC Transcontinental will continue to report annually on its performance relative to its ecoresponsible procurement objectives in its social responsibility report.

F5. Business strategy

Please explain
In its 2019-2021 Corporate Social Responsibility Plan “Acting Together”, TC Transcontinental had set up a goal to promote the use of sustainable materials and aim for 100% of our paper purchases to come from a third party certified or recycled sources. As Canada's largest printer, publisher of educational books and a leader in flexible packaging in North America, TC Transcontinental buys a significant amount of paper and plastic each year. This reality allows us to approach our procurement as an opportunity to play an active role in creating a circular economy for plastics and to positively influence forest management practices. Responsible procurement is perfectly aligned with our vision and our social and environmental strategy. It was identified as an important element by our stakeholders during the materiality analysis carried out prior to our three-year plan Acting Together. At the end of 2019, we started an evaluation process of our main suppliers in our Printing and Packaging sectors through the EcoVadis platform. Our goal is to integrate environmental, social and ethical criteria into our purchasing processes, in addition to traditional performance measures. We are pleased to see that the majority of our suppliers have participated in this assessment. Their responses will allow us to highlight best practices, identify areas for improvement and progress together towards our sustainable development goals. In 2007, TC Transcontinental published its first paper purchasing policy, whose scope was expanded in 2012. Its implementation has shown excellent results. In fact, the proportion of paper purchased that is FSC®, SFI® or PEFC certified or contains 100% recycled content reached 99% in 2019, up from 67% in 2012. Our in-house produced educational books are printed on 100% certified papers. We also hold FSC®, SFI® and PEFC chain-of-custody certifications, which allow us to track fibres directly from their origin all the way to our printed product.

<td>Responsible procurement was identified as material by our stakeholders during the materiality analysis carried out prior to setting objectives for our 2018-2021 plan. At the end of 2019, we started an evaluation process for our main suppliers, both in our Printing and Packaging sectors, through the EcoVadis platform. The EcoVadis sustainable procurement survey is set up to ask, among others, our suppliers about their CSR compliance, GHG emissions, energy efficiency programs and management. The goal of this process is to integrate environmental, social and ethical criteria into our purchasing practices, in addition to traditional performance measures. The suppliers’ responses will allow us to highlight best practices, identify areas for improvement and identify collaboration opportunities to progress towards our sustainable development goals. Phase 1 of the supplier assessments will be completed by August 2020. Phases 2 and 3 will be launched in the next months to include a wider array of suppliers. In percentage of procurement spend, around 80% of our suppliers from the Printing sector has been included in the first phase of the assessment. As this phase has yet to be completed, tangible impacts will be seen in the next reporting cycle. One hundred percent of our direct suppliers supports and improves their capacity to comply with your forests-related policies and commitments. This was demonstrated with our target of promoting the use of sustainable materials reaching 99% in 2019.</td>

(F6.10) Do you participate in external activities and/or initiatives to promote the implementation of your forests-related policies and commitments?

- **Forest risk commodity**
  - Timber products

- **Do you participate in activities/initiatives?**
  - Yes

- **Activities**
  - Involved in multi-partnership or stakeholder initiatives

- **Initiatives**
  - UN Global Compact
  - Forest Stewardship Council (FSC)
  - Programme for the Endorsement of Forest Certification (PEFC)
  - Sustainable Forestry Initiative (SFI)
  - Other, please specify (FSC; PEFC; SPC)

- **Jurisdictional approaches**
  - <Not Applicable>

- **Please explain**
  
  TC Transcontinental has been holding chain-of-custody certification from FSC, SFI and PEFC for over 10 years. We actively participate in discussions with these certification schemes, especially with respect to new or adjusted standards. In order to have a better understanding of sustainability in our new business sector, TC Transcontinental Packaging has joined the Sustainable Packaging Coalition® (SPC). The SPC brings together businesses, educational institutions and government agencies to collectively broaden the understanding of packaging sustainability. Being an active member of the SPC will allow TC Transcontinental to foster valuable partnerships through its new packaging supply chain, including as an active member of the Forest Products Working Group (FPWG). TC Transcontinental has joined the United Nations Global Compact, a voluntary initiative through which signatory companies commit to aligning their approach to social responsibility with universal principles relating to human rights, labour standards and environmental protection. Of the international sustainable development goals defined by the Global Compact, seven are fully aligned with the targets of our three-year Acting Together plan and our policies. Our practices are in line with the United Nations Sustainable Development Goal 15, which aims to “promote the implementation of sustainable management of all types of forests, halt deforestation, restore degraded forests and substantially increase afforestation and reforestation globally”.

---

(F6.11) Is your organization supporting or implementing project(s) focused on ecosystem restoration and protection?

- No

---

(F7.1) Do you verify any forests information reported in your CDP disclosure?

- No, but we are actively considering verifying in the next two years

---

(F8.1) Describe the key barriers or challenges to eliminating deforestation and/or conversion of other natural ecosystems from your direct operations or from other parts of your value chain.

- **Forest risk commodity**
  - Timber products

- **Coverage**
  - Supply chain

- **Primary barrier/challenge type**
  - Cost of sustainably produced/certified products

- **Comment**
  
  As demand is rising for certified fiber and paper, more land owners need to obtain Forest Management certifications in order to provide adequate supply. The cost of such certification can be prohibitive, and most small landowners can't afford such a change. Therefore, the certified fiber may become rare, and prices could end up getting much higher. The certification process itself should be more accessible: this would lead to a growth of sustainable forestry and ensure that the supply will meet the demand.
(F8.2) Describe the main measures that would improve your organization’s ability to manage its exposure to deforestation and/or conversion of other natural ecosystems.

Forest risk commodity
Timber products

Coverage
Supply chain

Main measure
Development of certification and sustainability standards

Comment
Responsible forestry practices start from solid forest regulations, not just from third-party certification. Differences in regulations between provinces/states and nations create inconsistencies in sustainable practices, which creates the need for third-party certification. A more unified set of regulations could ensure that location-based purchasing would be sufficient to manage the deforestation risk.
